085801105666 | destyarosa@gmail.com | <https://www.linkedin.com/in/destya-rosa-664ab1243/> | <https://bit.ly/PortofolioDestyaRosaa>
Sleman, Yogyakarta

Student of Electronics and Instrumentation at Universitas Gadjah Mada with a strong foundation in technical, managerial, and analytical skills. Experienced in system development, project coordination, and cross-functional teamwork. Proficient in troubleshooting hardware and IoT devices, programming (Python, C++, web technologies), and data handling. Demonstrated ability to optimize system performance, support user needs, and contribute to continuous improvement initiatives. Adaptable, solution-driven, and eager to apply technical knowledge to support IT operations and drive organizational efficiency.

EXPERIENCES

ID/X Partners

Jan 2025 - Feb 2025

Project-Based Virtual Intern : Data Scientist ID/X Partners x Rakamin Academy

- Exploratory Data Analysis (EDA) to uncover patterns in data
- Data Preprocessing & Feature Engineering to improve dataset quality
- Building Machine Learning models (Logistic Regression, LightGBM, CatBoost)
- Model Evaluation using Confusion Matrix, AUC-ROC, and Feature Importance
- Model Optimization to mitigate overfitting and enhance prediction accuracy
- Achieved best accuracy of Random Forest (98%) for predicting credit risk
- Feature Importance Analysis identified key factors influencing predictions

AMX UAV - Yogyakarta, Indonesia

Aug 2024 - Dec 2024

Internet of Things Intern

AMX UAV's core business lies in mapping drone manufacturing and aerial mapping services. Mapping drone currently plays a vital role in various industrial sectors, to meet the needs of spatial/land survey data. Aerial mapping missions required a reliable and easy to operate mapping drone. AMX UAV's product, Vertic is a vertical takeoff-landing (VTOL) mapping drone that is easy to control, fully autonomous, high stability, and capable of operating from a narrow site.

- Collaborated with senior engineers and the project team to enhance system functionality by programming sensors using Arduino IDE and performing calibration processes via the Modbus RTU protocol.
- Analyzed calibration data and tested IoT device stability using Microsoft Excel to ensure accurate sensor data.
- Diagnosed and resolved sensor issues with an 80% success rate, significantly improving system reliability for agricultural monitoring.
- Processed and validated data collected from IoT device, providing a reliable foundation for further analysis in agricultural monitoring

Universitas Gadjah Mada - Sleman, Yogyakarta

Aug 2024 - Dec 2024

Laboratory Assistant (Programming)

- Prepared and organized practical materials, including programming guides, examples, and software setups for students.
- Provided hands-on assistance during practical sessions, teaching programming concepts and debugging techniques with VS Code for programming tasks with C++ languages.
- Evaluated student performance in programming tasks, offering constructive feedback to improve coding skills and problem-solving techniques.
- Monitored students during practicals to ensure adherence to instructions and academic integrity, while resolving technical or conceptual challenges.

G-Connect Project - Yogyakarta, Indonesia

Jan 2023 - Dec 2024

Project Manager

Computer Science UGM research initiative, which aims to provide mobile network coverage in the remote areas of Indonesia with a cargo base transceiver installed in a gas balloon that will carry on cellular transmissions from the Google Loon Network.

- Led a cross-functional team of over 30 members, providing strategic direction and fostering effective communication to achieve project objectives.
- Coordinated with stakeholders, including government agencies, disaster response teams, and local communities, to ensure the system met the needs of end users and complied with regulatory requirements.
- Managed planning and resource allocation by analyzing financial data to optimize project efficiency and support seamless operations.
- Liaised with cross-functional teams and external stakeholders to ensure operational needs were met effectively.

Microsoft U-Crew UGM - Yogyakarta, Indonesia

Jan 2023 - Jun 2023

Student Ambassador

The Microsoft Community at the University of Gadjah Mada has role of technology about Microsoft.

- Acted as a representative of Microsoft to educate students at Universitas Gadjah Mada about Microsoft products and technologies, while expanding the use of Microsoft platforms within the campus community.
- Successfully achieved second place as an active and innovative student ambassador team
- Involved in developing a project case focused on solving social issues at UGM using Microsoft technologies.

- Received recognition from judges and mentors for the innovation and potential positive impact of the MentalTechGuard application on UGM students.

EDUCATION

Universitas Gadjah Mada - Yogyakarta

Aug 2022 -

Undergraduate Electronics and Instrumentation, 3.75/4.00

- Student of Penelusuran Bibit Unggul Tidak Mampu (PBUTM) received the KIP-K Scholarship

SMA Negeri 1 Pati - Pati, Jawa Tengah

High School Diploma in Mathematics and Science, 90.20/100.00

- One of the eligible students who was in the top 20

ORGANIZATIONAL EXPERIENCE

Himpunan Mahasiswa Elektronika dan Instrumentasi - Yogyakarta, Indonesia

Feb 2024 - Dec 2024

Head of Human Resources Bureau

- Successfully implemented two times mentoring skill up session with the participation of about 50% members of HMEI
- Developed and executed member training programs to enhance productivity and align with organizational goals.
- Conducted performance reviews and provided actionable feedback to improve team efficiency.
- Led performance monitoring and evaluation processes to ensure members' progress and alignment with organizational goals.

Elins Research Club - Yogyakarta, Indonesia

Mar 2024 - Dec 2024

Secretary

- Managed administrative tasks, including the preparation and filing of documents, drafting reports, and ensuring timely distribution of meeting agendas and minutes to stakeholders.
- Maintained and organized all organizational documents and records, ensuring accurate and timely access to essential files.
- Prepared agendas, organized meetings, and documented key discussion points and decisions, providing concise and structured reports.
- Maintained accurate records to streamline operational workflows

Mahapati Gadjah Mada UGM - Pati, Central Java

Apr 2023 - Apr 2024

Secretary

- Coordinated and managed all administrative tasks, including drafting meeting minutes, handling correspondence, and organizing reports.
- Assisted in preparing and reviewing important documents, reports, and communications for organizational activities.
- Managed logistical support for meetings and events, ensuring all arrangements were in place for successful execution.

SKILLS, ACHIEVEMENTS & OTHER EXPERIENCE

- **Hard Skills** 🧠: Python, HTML, CSS, JavaScript, C++, VSCode, Jupyter Notebook, Github, Arduino IDE, Eagle, Proteus, Microsoft, Google Docs, Canva
- **Soft Skills**: Leadership, Teamwork, Creativity, Project Plan, Time Management, Project Management, Communication, Detail-oriented
- **Achievements** 🏆 (2023): 2nd Winner Team in Microsoft Student Ambassador
- **Projects** 📌 (2023): G-CONNECT PROJECT
- **Projects** 📌 (2023): MentalTechGuard
- **Webinars Attended** 🎧 (2022): Seminar Teknologi Nasional dengan tema "Empowering Future Digital Talent With a Robotic and IOT Implementation"
